Clark University Recycling Guidelines

**Recycling Guide: Short Version** for the full list, see below...

**Sustainable Clark Recycles:** Paper, Cardboard, Metal & Glass, Electronics, Batteries, Bulbs, and ALL Plastics #1 - #7 (these are the stiff, hard ones - not squishy)

Not only is recycling good for the environment and the economy, it's actually illegal *not* to recycle most of these things! Plus Clark gets direct financial benefit from managing recyclables as the valuable commodities they are. Many other things can be donated or recycled. See the list below for more than 20 other categories & information. If you can't find it on the list or have questions about what can and cannot be recycled, contact Sustainable Clark 508-793-7601. For an emergency pick up or top report a problem, contact Facilities Management at 508-793-7566.

**Reduce, Reuse, Recycle.** *Rethink* ways you can *Reduce:* consider packaging when you purchase, bring a cloth bag or just carry a few items, request that on-line shipments be packed in recycled paper - just a few examples! *Reuse* donate any and all gently-used unwanted items to Clark's student-run Community Thrift Store. They will find a good home, benefit sustainability and student run ventures, build local economies, and you will get a store discount coupon! *Recycle and Compost* all you can!

**Recycling bins** for mixed clean paper and plastic/metal/glass are located throughout the Clark campus in residence halls, academic buildings, administrative offices, and common areas. **Compost bins** for organic materials are located in the UC, the AC and residence halls. Faculty and staff offices are provided blue deskside bins for paper and are welcome to designate a box or trash can for recycling plastic/metal/glass - custodians will collect and consolidate recyclables in the building's central recycling area.

**Please use the recycling bins!** You know it's the right thing to do! A recycling bin is never very far away.

The **student Recycling Crew** picks up recyclables from every campus building once a week during the academic year. If you need an emergency pick-up please call Facilities Management 508.793.7566. For questions about what can and cannot be recycled at Clark

**Clark's Recycling Center**, located at 501 Park Avenue, collects and processes campus recycling. It also handles responsible recycling of hazardous materials such as florescent light bulbs; electronic waste such as computers (also called e-waste); bulky metal items such as desks. Disposal of oils, solvents, paints and chemicals is managed according to regulations by Facilities Management staff. Please call Facilities Management at 508.793.7566 for pick-up of any of these items.

**Clark Dining Services** composts all used paper goods (like napkins), food scraps from the kitchen and the cafeteria, and compostable containers, cups and cutlery from the cafes. Please use the slots labeled compost for all of these items when eating in Jazzman's or the Bistro. *If it was ever alive, you can compost it!*

**Clark Composts!** Compost bins are all over the UC and the AC, and more bins are located in kitchens and hallways of all residence halls. If you live off-campus, pick up a biodegradable bag from the Help Desk in the UC or use your own container, and bring your organic materials to the compost bins in the AC or UC. Designed, tested and funded by Clark students from 2011-2016, Clark Composts! enables us to divert even more from landfill. Soiled paper, Bistro containers, dryer

lint - the list goes on! *If it was ever alive, you can compost it!*

**Recycling off campus**  The city of Worcester supports single-stream recycling (combined paper, plastic, glass & metal in one receptacle), and you can get a free recycling bin for curbside pick up. Ask your landlord or search the web for 'Worcester city recycling program'.

### Items You Can Recycle & Donate for Re-Use

<table>
<thead>
<tr>
<th>ITEM</th>
<th>INCLUDING</th>
<th>WHERE/HOW</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Paper</strong></td>
<td>copy paper, office paper, notebook paper, folders, envelopes, mail, magazines, glossy paper, tissue, newspaper, packaging, paper bags, colored paper, sticky notes. &quot;If you can rip it, you can recycle it&quot;!</td>
<td>bins marked 'Paper' throughout campus: paper clips, staples OK</td>
</tr>
<tr>
<td><strong>Confidential paper records</strong></td>
<td>paper that includes personal or confidential information must be shredded</td>
<td>TIP: use the blank side for scrap paper</td>
</tr>
<tr>
<td><strong>Cardboard</strong></td>
<td>boxes, corrugated cardboard, paperboard (thin cardboard like cereal boxes), milk and juice cartons, packaging, liners, pizza boxes, tubes (like inside paper towels), egg cartons</td>
<td>take to secure lock boxes on campus for ShredIt shredding service (call ITS for locations) - it is recycled</td>
</tr>

- refrigerators, washing machines, etc.
- MassRecycle

other items

Please keep recycling categories separate! This is important for the commodity value and to prevent flagged loads.

Plastic, metal and glass do not go in 'Paper' recycling bins. Keep our Promises!

Paper and cardboard do not go in 'Plastic/Metal/Glass' recycling bins. Keep our Promises!

Unacceptable for Recycling at Clark University

Please DO NOT put the items listed below into Clark University Recycling Bins! They are considered 'contamination' – if more than 10% of total contents is 'contaminated' an entire bin of perfectly good recycling turns into worthless trash. One wrong item can flag the entire load because it all gets put together! If in doubt, throw it out. All these go in a trash can and they are the only items that go in a trash can. There are surprisingly few!
Unacceptable in 'Paper' Recycle Bin

Used paper towels, used facial tissues, foil or plastic lined paper, shipping envelopes with bubble lining, sippy boxes, used paper coffee cups, greasy paper, food-encrusted paper, food itself. **But!!** You can compost soiled paper, wet coffee cups greasy/foody paper and all food!

Unacceptable in 'Plastic/Metal/Glass' Recycle Bin

Plastic bags such as chip bags, candy wrappers, plastic box liners; plastic wrap (Saran wrap), any soft plastic you can squish in one hand; containers with food or liquids in them, food itself, foam sheets, foam wrap, foam peanuts, styrofoam, broken glass, light bulbs, sharps (needles), CD's or other discs. Empty all containers!
